

Bubble washing machine

SS Engineers & Consultants is engaged in designing and manufacturing of quality food processing machinery and food processing equipment like tomato paste production line, slate conveyor, fruit washing machine, tube aseptic sterilizer, autoclave, pasteurizer and aseptic filling machine. Besides manufacturing tomato paste pasteurization, production line, fruit juice process, packaging line, milk and yoghurt processing and packaging lines.

Situated at Rajahmundry, in Andhra Pradesh, India, our production facility is equipped with excellent infrastructure having latest machinery, technology used to design and develop precision-engineered process equipment for food & biotech produce, our range of product includes washing machine, filling machine, autoclave, pasteurizer, tunnel Sterilizer and Cooler, etc. Utilizing our sophisticated production facilities, we are capable to offer high performance and flawless turnkey solutions for various food processing requirements of our clients.

Quality is the mantra of our success. We have survived the tough competition in this sphere, on the grounds of perfectionism and professionalism. This is the reason why we are favored and have earned a trustworthy reputation amongst our clients.

SS Engineers & Consultants are rooted in the fundamentals of innovative design, exceptional customer service and excellent product development. Adapting the international standards of reliability and safety, we ensure that all our products, machineries are manufactured at par with the international standards safe to operation and use. We endeavor to achieve the highest level of customer satisfaction and our consistent and sincere efforts have helped us to clinch many high profile clients. Our innovative design, competitive pricing and excellent customer service made us committed to improve the efficiency of our products.

If you are interested in our products: tomato paste production line, slate conveyor, fruit washing machine, tube aseptic sterilizer, autoclave, pasteurizer and aseptic filling machine do not hesitate to contact us, we welcome suggestions and feedback from our clients, in order to serve them better.

Serving Industries:
Agro, Biotech and Pharma Industries.
Poultry, Live stock, Meat & Catering Industries. Hotels, Food Production, Farm Exports , Spices & Sea Food Industries since decade with its reliable products & services

SS Engineers Bubble Washing machines are used for washing gherkin, vegetable, fruits, roots, leafy vegetables, Shrimp at food preparations, processing and catering industries.

SS Engineers & Consultants vegetable washing machine is air bubble type that can wash all kinds of vegetable and fruits.

Capacity: 600-5000kg per hour.
(also can design custom)

Pre wash with air bubble washing tank and final wash through spraying pipe ensures the best washing effect.

Optionally can be supplied with conveyor to facilitate the fruits and vegetables to the next stage of processing.

For cleaning fruit and vegetable? You've got the right place!

Capacity (kg/h)	1000	2000	3000	5000	10000
Power (kw)	1.5	2.2	2.2	3.5	5.7

SS Engineers compact high volume machines wash fruits, nuts or vegetables under high pressure (warm or hot) water spray depending on the food material composition to provide clean raw material for further processing. The temperature and pressure can be adjusted in the machine to facilitate cleaning of varied food materials. The machine has inbuilt filtration system to recycle the water.

Products:
Fruits washer, Roots, Luminous leafy vegetables washer, Inspection Conveyor, Copra washing machine, Shrimps washing machine & other Farm produce agro products.

manufacturing & solutions

Modern life-style is evolving continuously and has given rise to several new needs. In order to meet these needs New Processing Plants have been set up globally. For creating innovative products these processing plants need advanced technologies and equipment. Sri Pumps Group provides such advanced products for numerous industrial sectors.

Established in the year 1999 Sri Pumps Group is a globally recognized manufacturer and supplier of a wide range of products. Sri Pumps Group has a total of 4 manufacturing units located in India. The spacious manufacturing plants, technologically advanced state-of-the-art machinery and modern Infrastructure makes Sri Pumps Group Companies very competitive in this growing world.

SS Engineers & Consultants was established as a subsidiary of Sri Pumps & Fittings Industrial Corporation in 2007. SS Engineers & Consultants specializes in Design, Engineering and Fabrication of Stainless Steel Equipments, Turn-key projects along Cleaning Equipments for a wide Range of Industries.

SS Engineers & consultants are a leading supplier of food processing equipment and solutions in India. Food Processing Equipment requires hygienic design, each processing task is different and has its own difficulties, and today business requires the correct tool for each step in the production process for optimum efficiencies and quality of the end product.

SS Engineers offer complete solutions which includes machinery, complete flow layouts, product lines, CIP Systems, Steam pipe lines, hot and cold water systems, piping and drainage.
